

IGBC GREEN INTERIORS CONSULTANCY

Ameet Vikram Kothaari, IGBC AP

FOR ARCHITECTS & INTERIOR DESIGNERS

Your next fit-out can be *IGBC Green Interiors certified*

We handle the certification from design stage to handover, so you can keep designing.

Clients want spaces that are *healthier* and *cheaper to run*

90% of our time is spent **indoors**.
Air quality, light and comfort shape how people feel and work.

30–40%

lower energy cost

20–30%

lower water requirement

Plus better indoor air quality, human-centric lighting, non-toxic materials, superior acoustics and healthier occupants.

Built for *commercial interiors*

Tenant-occupied commercial spaces

The IGBC Green Interiors rating programme is designed for the specific requirements of tenant fit-outs.

Owner-occupied spaces too

They qualify as well, provided these requirements have not already been addressed in the main building.

Ideally suited, not limited

Office fit-outs, malls, retail, hotels, restaurants, resorts, IT spaces, banks and other buildings.

Designing one of these? *Let's certify it.*

Retail spaces & showrooms

Restaurants & food joints

Office & IT fit-outs

Malls & large commercial interiors

Hotels, resorts & small hospitality

Bank branches

Clinics

Other commercial spaces

End to end, *from design stage to handover*

1

Design stage

We join early, set the certification target with you and fold the green requirements into the design brief.

2

Registration

We register the project with IGBC under the Green Interiors rating.

3

GreenPro product selection

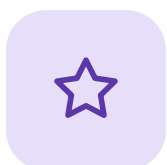

We help you choose GreenPro-certified materials and products that fit your design and budget.

4

Certification & handover

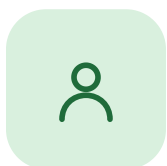

We prepare the documentation and see the project through to certification, ready for handover.

Make Green Interiors *your USP*

A certified green offering

Stand out with clients who want healthier spaces and lower running costs.

One point of contact

Registration, product selection and certification handled by one IGBC AP.

You keep designing

We fit into your workflow from the first drawings, not at the end.

GreenPro products that fit

Certified materials chosen to suit your design intent and budget.

LET'S TALK

Have a fit-out on your *drawing board*?
